

# THE VOID OF THE ASTEROIDS

TAMARA KNEZEVIC & JUDITH KÖHLER  
ENTWERFEN MYSTERY HOUSE

Inspired by the beautiful story „Le Petit Prince“ by Saint-Exupéry, we have created a house which conveys the characteristics of the main figures and addresses themes of loneliness, friendship, love, and loss. The mystery house is situated in Europe's only desert: the Tabernas desert in southern Spain, and is made of rammed earth. Carefully positioned water ways and vegetation, as well as cross ventilation and shading structures ensure a pleasant climate despite the location. The visitors spend one day in the different atmospheres downstairs and one night on the rooftop, gazing at the unpolluted night sky. When the visitors leave, they experience catharsis, just as the little prince did after his travels through the galaxy.
