

UNDER

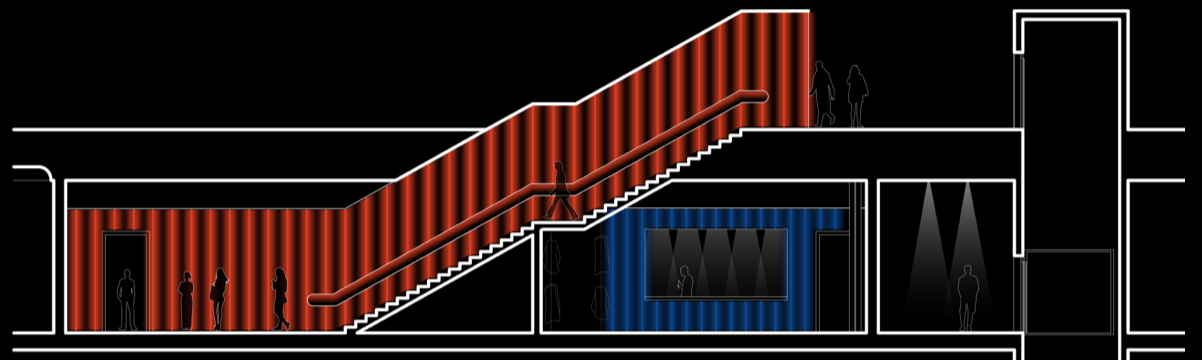

GROUND FLOOR

We created our BAR TO BE in the recently unused Metro Station Französische Strasse in Berlin Mitte.

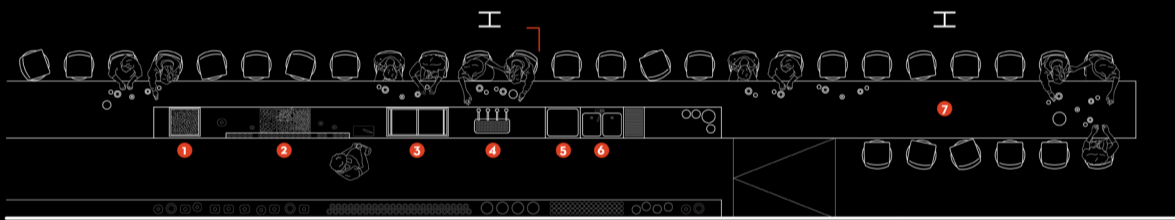

Since our bar is underground, we created a versatile light concept inspired by the typical Berlin Metro seatings.

The main room consists of a 70 meter long bar. On the other side of the main room we created a transformable space that can be used for various events.

The Bar has four working stations, one of them shown below. Behind the bar the passing trains are visible through a glass wall, to create an interesting atmosphere.

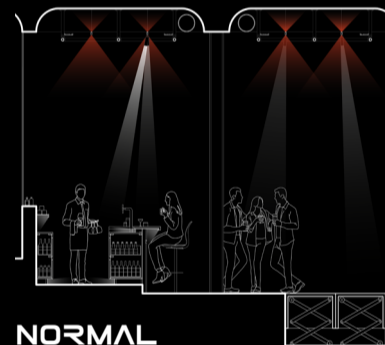

ENTRANCE

BAR DETAIL

- 1 ice bin
- 2 speed rail | fruits
- 3 toploader fridge
- 4 drink pull
- 5 dishwasher
- 6 double sink
- 7 extended bartop
